

CORE SKILLS

- Node.js / Express
- Python / Flask
- Rust · C
- React / TypeScript
- REST API Design
- System Architecture

DEVOPS & CLOUD

- Docker / Kubernetes
- AWS · GCP · DigitalOcean
- GitHub Actions
- Jenkins / GitLab CI
- Ansible / Puppet / Chef
- Nginx / HAProxy

DATA & STORAGE

- PostgreSQL / MySQL
- MongoDB / Redis
- SQLAlchemy

PLATFORMS

- WordPress (advanced)
- Elementor / WooCommerce
- Custom PHP / CPTs

EDUCATION

ALX / Holberton

Software Engineering
Backend Track
Feb 2023 – Dec 2024

Backend-heavy full-stack engineer with 7+ years building production systems — from scalable APIs and cloud infrastructure to payment integrations and automation pipelines. Proven at reducing costs, shipping reliably, and owning systems end-to-end.

EXPERIENCE

Lead Engineer2022 – 2025

E.T. Technology Enterprises · Remote

- Led development, deployment & maintenance of multiple production web apps and cloud servers.
- Integrated open-source tools into workflows, cutting software licensing costs by 50%.
- Architected CI/CD pipelines (GitHub Actions, Jenkins) enabling zero-downtime deployments.
- Managed Kubernetes clusters on AWS and DigitalOcean; containerised all core services with Docker.
- Mentored team members on system tooling, improving internal ICT adoption and efficiency.

Freelance Full-Stack Developer2018 – Present

Independent

- Shipped custom web apps, REST APIs, and WordPress solutions for clients across multiple industries.
- Delivered advanced WordPress builds: custom CPTs, WooCommerce, referral systems, and SEO.
- Collaborated with distributed teams to deploy cloud-based solutions on time and within scope.

Senior Content Officer2016 – 2025

Jumia Kenya / Uganda

- Managed product display across high-traffic e-commerce frontend; ensured accuracy at scale.
- Built advanced Excel KPI trackers used across departments for reporting and project progress.

SELECTED PROJECTS

Files Manager API

Node.js

Redis

MongoDB

Bull

Production file platform with background queues, token auth, thumbnail generation, and permissions.
github.com/nickfff-dev/alx-files_manager

EasyBets

React

Node.js

Payments

Sports betting platform with real-time odds, user accounts, and secure transaction flows.
easybets.vercel.app

Catcha Flight

Python

API integration

Caching

Flight price aggregator scanning multiple carriers for cheapest routes with smart date-range caching.
catcha-flight.vercel.app

Grant Tracker

React

Node.js

PostgreSQL

Grant lifecycle management system replacing spreadsheet workflows for nonprofits and institutions.
grantrackerv1.vercel.app

AirBnB Clone v2

Python

Flask

MySQL

HAProxy

Full-stack AirBnB replica with custom storage engine, RESTful API, and HAProxy load balancing.
github.com/nickfff-dev/AirBnB_clone_v2
